The Wildland Fire Assessment Program (WFAP) will teach you how to work-side-by-side with homeowners to identify threats around their property that may be susceptible to wildfires. The WFAP is a joint effort between the National Volunteer Fire Council and the U.S. Forest Service to prepare fire department members with the necessary information, skills, and resources to conduct home safety assessments and provide residents with recommendations as to how to make their homes more fire adapted in the wildland-urban interface.
